USER MANUAL

SYTECH®

When technology turns to art

TABLE **BLENDER**

SY-BV55

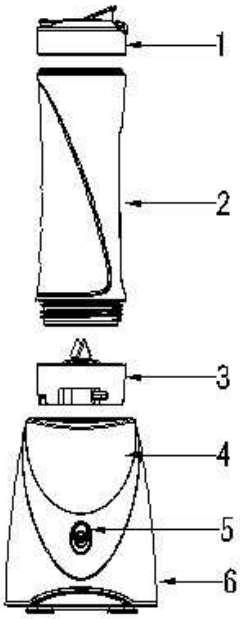
Welcome

Welcome to Sytech! Thank you for purchasing the new Blender SY-BV55. Please read this manual carefully before operating your product and pay close attention to the precautions which are mentioned below. Store this user manual in a safe place for future reference.

Important Safeguards

- Please read the instruction manual before using.
- Close supervision is necessary when the appliance is being operated near children.
- When shifting the appliance from one place to another, handle it with great care; if the unit is dropped or hit, it will stop functioning properly.
- The appliance should always be laid on a smooth table or plane surface during use.
- Do not let the cord hang over the edge of a table or touch hot surfaces.
- Make sure the appliance is unplugged when not in use. Only plug in the plug to a wall outlet, do not use extensions or multi socket outlets as this could provoke a circuit overload.
- If your wall outlet becomes loose, the appliance may overheat. Should this occur, contact Sytech Service Center.
- Any attachment which is not supplied with the blender must not be used as it may cause fire, electric shock or personal injuries.
- Care shall be taken when handing the sharp cutting blades, emptying the bowl and during cleaning. Do not misuse or you will be injured.
- Make sure the appliance is properly & completely assembled before operating.
- Do not touch the small cutting blades in the base
- Do not immerse the unit in water or any other liquid. Use only a moist cloth to clean the body.
- Do not use abrasives cleaners when cleaning this appliance.
- This appliance has an overheating protection installed inside, when the appliance overheats, the power will turn off. The appliance will resume normal functions once cooled down – usually after 15 minutes.
- In order to prolong the life span of the machine, we suggest that the machine should stop for 3 seconds every 10 seconds. The appliance must not be used for more than 2 minutes continuously.
- Do not exceed the maximum quantities and processing times indicated in the tables. Let hot ingredients cool down before chopping them or pouring them into the blender jar unit (max.temperature80℃/175°F)
- If the power cord is damaged, the unit does not function properly, or the blades or other accessories are broken/damaged contact Sytech Service Center, never try to manipulate the product by yourself as this may invalidate the guarantee.
- Always store in a dry and safe place when the appliance is not being used.

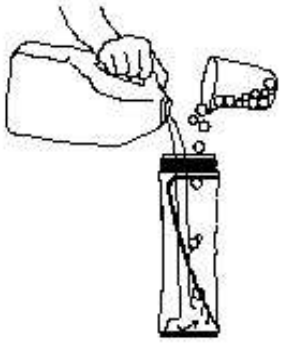
Parts and Use of the SY-BV55



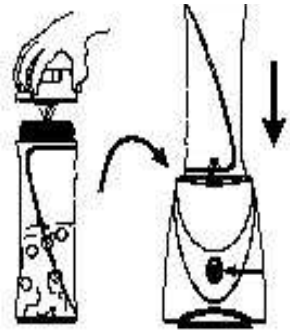
1：Spill-proof drinking lid
2：sport bottle
3：Blade assembly
4：blender base
5：Button switch
6：power cord

The blender is intended for Blending fluids, e.g. dairy products, sauces, fruit juices, soups, mixed drinks, shakes. Avoid touching the sharp blades. If the blades get stuck, unplug the appliance and remove the ingredients that are blocking the blades with a spatula.

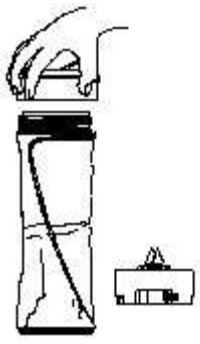
1. Place the sports bottle on a flat surface with the open end facing up. Fill the sports bottle with your favorite ingredients without exceeding the max marking.



2. Fasten the blade assembly on the open end of the sport bottle. Turn the sport bottle upside down, line up the arrows on the base, and place the sports bottle on the base. Begin the blending process by simply pressing the sports bottle slightly downwards.
   To lock the sport bottle in the base for hands-free operation, simply turn the sport bottle clockwise in the base. Blending will stop once you either stop pressing the sport bottle downwards or once you unlock the sport bottle from the base.



3. Turn the sport bottle over and place on a flat surface. Replace the blade assembly with the drinking lid and the bottle is ready to.



Product Cleaning:

Cleaning the appliance and its parts is easiest immediately after use.

- Do not use abrasives, scourers, alcohol, etc to clean the appliance.
- Never immerse the body unit in water or other liquids.
- Never clean it with water
- Never clean it in the dishwasher.
- Unplug the appliance and remove the detachable parts.
- Clean the parts in lukewarm water with some washing-up liquid and rinse them under the tap or clean them in the dishwasher.
- If necessary, remove the rubber sealing ring from the blade units and rinse it with water.
- Use only a moist cloth to clean the body unit.
